

QUALITY AND ENERGY POLICY

In order to enhance its knowledge, technical expertise and human resources, BESFOND has adopted a Quality and Energy Management System based on the international standards UNI EN ISO 9001 and UNI EN ISO 50001.

This entails the Company's commitment to the implementation and continuous improvement of a management system that takes into consideration and satisfies a heterogeneous set of requirements, including:

- ✓ Requirements of UNI EN ISO 9001 and UNI EN ISO 50001;
- ✓ Management of objectives and targets relating to quality and energy aspects;
- ✓ Legal requirements applicable to the Company's activities and other requirements relating to energy efficiency, energy use and energy consumption;
- ✓ Requirements identified by all interested parties;
- ✓ Evaluation of the procurement of products and services from an energy perspective where these affect the Company's energy performance;
- ✓ Evaluation of energy aspects during the design phases of patterns and production tooling.

OUR MISSION

We transform our customers' requirements into ductile and grey cast iron castings, manufactured in small and medium production runs through a resin-bonded sand moulding process.

We oversee the entire manufacturing process, from the design phase through to final inspection and testing, ensuring full product traceability, high quality standards, and continuous monitoring of the energy resources employed throughout production.

OUR VISION

To be recognized as a leading player in the foundry industry, capable of providing a flexible, responsive and sustainable service, delivering comprehensive, high value-added solutions to our customers.

OUR VALUES

PASSION: an essential driving force behind everything we do. It inspires us and motivates us every day to continuously improve our work, a commitment that has been handed down for more than 60 years across three generations.

PRIDE: we have the experience, expertise and capabilities required to create value for our customers. We dedicate our full commitment to achieving tangible results. This is what makes us proud of our mission, our people, our products and, ultimately, our Company.

FLEXIBILITY: our high level of production flexibility enables us to manufacture a wide range of high value-added products. Our ability to make prompt and practical decisions allows us to overcome challenges and approach the future with a proactive and pragmatic mindset.
